## CLASSIC 77

a space saving solution

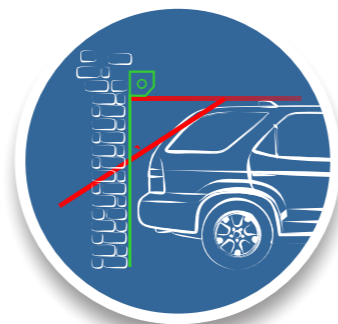

The Classic 77 roller garage door is the perfect budget-friendly alternative to our Professional 78 model, designed to deliver the same superior insulation in a streamlined package. Featuring a durable 77mm curtain lath, the Classic 77 ensures excellent thermal performance while offering a sleek and modern appearance. Available in three versatile paint finishes: White, Black, or Anthracite Grey.

The Classic 77 roller door suits a wide range of home styles. Standard features include 250 end plates and a basic remote, with optional upgrades such as a Half Box, Full Box, Photocell, or Safety Edge, allowing you to tailor it to your needs. The Classic 77 brings together functionality, style, and value without compromise.

### 7 YEARS WARRANTY

MOTOR COMES WITH EXTENDED WARRANTY

### SPACE SAVING

IDEAL FOR EXTRA STORAGE SPACE AND EXCELLENT FOR SHORT DRIVEWAYS

## FEATURES INCLUDED

### TWO HANDSETS

We can supply two and four-channel hand transmitters to operate up to four doors using one handset (as standard, we provide 2x two-channel handsets).

### WALL MOUNTED CONTROL BOX

The roller door control unit also allows the operation of doors without hand transmitters and connecting additional features like keypads, registering additional handsets, setting alarms, and intelligent systems. It comes with **3 YEAR WARRANTY**.

### ENDPLATES

A pair of 250mm cast aluminium Endplates are necessary to provide stable operation. The Endplates support the most vital parts, which are the motor and barrel. Sturdy Endplates ensure long-lasting and fault-free operation.

## OPTIONAL EXTRAS

### REFLECTIVE PHOTOCELL

Reflective photocell systems used in roller doors, also known as safety photocells or safety sensors, are designed to enhance the safety of the garage door operation by detecting obstacles in the door's path.

### SAFETY EDGE

It is a device fitted with a rubber seal, securing the roller door's leading edge. It protects the roller door and whatever is left in the way of the operating door. The lightest touch on the bottom edge will make the door roll back up.

### FULL BOX

An aluminium box comprises a 90° and a 45° profile to create a fascia when headroom is limited and a neat finish inside the garage.

### HALF BOX

Half Box a 90° aluminium profile that creates a fascia in case of limited headroom. A solution that allows to maintain the budget, however without that neat finish inside the garage that is provided by the FULL BOX.

## CLASSIC COLOURS

paint finish range

Three colours are frequently selected by our customers: White, Grey, and Black. Due to their popularity, these finishes provide the most cost-effective solution while maintaining high levels of quality and workmanship and the shortest lead times.
